Refractive Lens Exchange (RLE)

The game changer for golf – see better, play better

If you're over 45 and finding it harder to play with glasses or contacts, or you are not seeing as well as you used to, Refractive Lens Exchange could be your solution.

RLE is a painless vision correction procedure that replaces your aging natural lens with a premium modern intraocular lens.

Sharper focus on the course

See better on the golf course – from the ball to the pin – without glasses or contact lens.

Freedom from glasses & contacts

Enjoy better vision with significantly less need for glasses for golf, travel, driving and everyday life.

Premium vision at all distances

Modern RLE lenses provide better vision without glasses at a range of distances. Come in for an in-depth assessment of what you can achieve.

Quick recovery, long-lasting results

Return to normal activities quickly. Results depend on many factors, including your type of eyesight problem and any previous eye surgery.

Why golfers choose RLE

- Easier to track the ball and read the greens
- Better brightness and contrast
- Ideal for active lifestyles and travel
- Better near vision without glasses
- A proven and safe alternative to laser surgery for over 45s.

Heard about us from Mad About Golf?

FREE Vision Correction assessment + $500 off* the RLE procedure

*The fee for RLE surgery, if you have both eyes done, will be reduced by $500 for any Mad About Golf client. You must let us know before the day of the procedure to claim this.

Book your consultation today

Take the first step to better vision and better golf! Call us for a phone consultation and a personalised discussion of what is possible in your case. Good distance vision without glasses for sports is generally expected.
